+1 262 409 3767

I am currently in school with UW Milwaukee edX boot camp full stack development program. (2023)

I currently work with H&S Protection Services until I am able to get my foot in the door in full stack development to begin a new career.

I love problem solving!

Authorized to work in the US for any employer

## Work Experience

---

### Service Technician

H&S Protection - Pewaukee, WI

March 2023 to Present

I am currently in school in Full Stack Development. H&S Protection is a local security company. This is a temp position while I am in school.

I service access control, burg, fire and video/cctv systems.

### Lead Web Designer and Developer

Velocity Marketing Group - Oconomowoc, WI

April 2022 to March 2023

I was hired on to take on a designers role. I then merged into taking on a jack-of-all-trades role since the company lacked the proper resources. I did everything from costumer support, brainstorming, gathering ideas/ researching, content development, graphic design (I used Canva pro and a design software called Xara - similar to adobe), web design and development (I started out using Xara and Godaddy/cpanel, but then quickly merged over to Squarespace due to lack of design features. Squarespace didn't live up to the standards I was looking for and required to much cost to implement third party apps. I used CSS and HTML coding to do a lot of what other platforms already offered. I then moved to Wix and I also use Wix editor X which is a competitor to webflow. I also did domain transfers and connects and dealt with DNS settings including MX records when necessary. I have learned and taught myself all this. I am a quick and happy learner.

This company folded...

### Field Service Technician

Engineered Security Solutions - Brookfield, WI

April 2018 to June 2022

My role at ESS started as a field technician installing wires and equipment for security systems ie security cameras and access control devices. I was made project lead and then moved to field service technician.

I was to problem solve and troubleshoot various security systems in a professional manner maintaining customer service satisfaction and build relationships. In addition my role involved IT, programming, and low voltage systems. I worked with Axis, Hikvision, American Dynamics, ExqactVision security camera systems and many more including analog systems, and worked with ButterFly MX, doorking, HID, Brivo, Honeywell, Kantech and many others systems and hardware.

### **Automotive Technician**

HIS Auto - Oconomowoc, WI  
August 2017 to April 2018

Auto Machinic Duties. Anything from rotating tires to replacing engines.

### **Business Owner/Freelance**

Delta-Liebherr/Detection Data Technology/AdvaTech - SE Wisconsin  
December 2015 to August 2017

My entrepreneur spirit was thriving but the competition was stronger.

This was an attempt to start and run my own business in the low voltage/data industry with the cards dealt to me at the time.

### **Engraver**

Southern Graphic Systems - Waukesha, WI  
June 2013 to June 2015

Operated CNC lathe Machines used for copper diamond engraving for printing presses.

### **Quality Control Inspector**

Quality Plating of Tulsa - Tulsa, OK  
April 2010 to August 2013

While in school in Tulsa Oklahoma, I worked as a quality control inspectors. I was in charge of all part coming and going through the shop and from various processes including plating, NDT, paint, masking, labeling, hardness and shipping and receiving.

### **Warehouse Supervisor/Product Designer**

Kirby Built Quality Products - New Berlin, WI  
April 2005 to August 2009

My first role began as a fabricator. I was promoted to Warehouse 'Foreman', then later I was product designer.

Kirby Built is an outdoor plastic furniture provider located in New Berlin WI.

## **Education**

---

### **BootCamp Level in Full Stack Development**

EdX | UW-Wisconsin - United States  
May 2023 to Present

### **Some collage in Aviation Technology/Engineering**

Tulsa Community College - Tulsa, OK

August 2011 to June 2013
